# Corporate Plan action plan

During the Corporate Plan engagement, you told us that it was important for you to see clear actions and expected outcomes so you can hold us to account.

## Our ambitions

1. Our children and young people are cared for, safe, supported, and are given equality of opportunity to thrive

2. Our communities are caring, healthy and safe, where people help each other to live well

3. Our towns and villages are thriving and sustainable places to live, work and visit

4. Our council delivers consistently good services and value for money to support our community

This action plan outlines the actions we will take to help achieve our Corporate Plan vision to be open, fair and green.

We have four ambitions and for each of these we have identified a number of commitments. For each commitment there are a series of actions and expected outcomes. These will form our Performance Management Framework for 2024/25 with clear targets against each outcome. We will review this framework annually, and we will **publish updates quarterly** on how we are doing against these actions and outcomes.

We are committed to ensuring we meet our equalities objectives and we have identified which actions are particularly relevant to equality groups (identified by this symbol ) , including where we will set more stretching targets relating to specific groups (identified by this symbol ). As part of our quarterly monitoring, we will review how these actions demonstrate positive outcomes for the relevant equalities groups.

We are also committed to contributing to the **United Nations Sustainable Development Goals** and have shown in this action plan where actions are contributing to the seventeen goals.
