## **PHE** Serology Working Group

The Serology Working Group provides oversight of sero-epidemiology work for <u>COVID-19</u> in England and partners with international colleagues, including the <u>WHO</u>, on these serological studies. The group monitors and reviews work on the establishment and running of population-based seroprevalence surveys in England.

Sero-epidemiology is crucial in informing our understanding of the extent of transmission of <u>SARS-CoV-2</u>, and to monitor how this changes over time.
