The UK's Medicines and Healthcare Products Regulatory Agency (MHRA) has approved the Pfizer-BioNTech vaccine for use in 12- to 15-year-olds after a "rigorous review" found the jab to be "safe and effective in this age group."

clinical trial data provided by the company.

Announcing its decision, MHRA Chief Executive Dr. June Raine said that the regulator had concluded *"the Pfizer-BioNTech Covid-19 vaccine is safe and effective in this age group,"* highlighting how the data shows *"the benefits of this vaccine outweigh any risk."*

The clinical trial had involved 2,000 children aged 12-15 and found that there were no cases of Covid-19 among those who received two doses of the vaccine, compared with 16 infections within the placebo group. No new side effects were identified or reported in the trial and the safety levels were seen as comparable to those in young adults.

The MHRA's statement paves the way for the UK government to expand its inoculation programme to children, with the decision in the hands of the country's Joint Committee on Vaccination and Immunisation (JCVI), which advises the UK government on its inoculation strategy.

stating that the government *"will be guided by the expert advisors."*

The Pfizer vaccine has already been approved for use in UK children aged 16 and 17, with the government preparing plans to vaccinate those children in a bid to control the transmission of the virus within secondary schools.

The UK government hasn't announced its plans in this area but the MHRA's approval for children aged 12 to 15 could allow them to include those students in any school-based vaccination scheme.

Next it will be no jab, no school. Surely they can't keep a lid on the growing number of side effects for ever.

I'm guessing their "rigorous review" failed to include the reading of the FDA's document 144413 which, while being largely a cheerleading piece for Pfizer's vaccine, briefly summarises the results of the trials on 12-15 year olds. The tables on pages 25-27 show the adverse outcomes.

No fewer than 86% of participants reported adverse events; 44% were moderate or severe. The data shows outcomes following first and second jabs. Strangely, there were 30 fewer second jabs administered with no explanation for the discrepancy.

I'm guessing the "review" also failed to take account of the Salk Institute's studies showing that spike proteins, rather than any virus, can cause severe vascular damage within the body, and a major bio-distribution study which shows that toxic, bioengineered spike proteins directly developed from the vaccines circulate in the blood stream and therefore can travel throughout the body, including the brain, liver, spleen, ovaries, etc, etc.

All of this, of course explains the crippling adverse events being (grossly under) reported in the various databases, including strokes, seizures, paralysis, brain damage, blindness, miscarriages and so on. A whole panoply of nasty outcomes which all have one thing in common - vascular damage.

This is criminal. Anyone who administers (or approves the administration) of these "vaccines" to children should be charged with murder! Same should apply to the parents who allow their children to be injected with these "vaccines". This disease doesn't effect young children, subject them to the risk of these experimental mRNA vaccines!

Any Parent allowing their child to be vaccinated is failing in their basic duty to protect their child and is as guilty of an assault as the person performing the vaccination. Reported in the Epoch Times, VAERS (the Vaccine Adverse Event Reporting System) in the USA reports that more than 80% of children vaccinated with the Pfizer vaccine suffer a serious adverse reaction ! For vaccination against something against which a child has 100% immunity !! This above all, proves that the phoney Covid pandemic is just an excuse for them to vaccinate our population with their evil potion. We all have to resist vaccination at all costs ! - Particularly the vaccination of our innocent children

Poland, the UK, Australia, France, the US - why vaccinate 12 year old's when the virus does not effect those. The same plan by the same perversed controllers - evil, evil, evil..

This vaccine insanity has just reached a new and perverse level. I can only hope some clever lawyer holds MHRA Chief Executive Dr. June Raine and all involved accountable ...what a disgraceful abuse of children.

"in a bid to control the transmission of the virus within secondary schools. "

It doesn't do that though.

Vaccine companies motto is: jab them when their young and reap the \$£rewards as they grow up dependent on drugs.
