

Green Infrastructure

Green Infrastructure

Thank you for helping us to improve our green infrastructure strategy. The following questions will help us to understand how people feel about our parks, beaches, countryside (natural environment) and what is most important about it.

We have structured the survey around some key themes:

- How you use the natural environment and what is important to you
- What you think about the strategy's aims and objectives
- Do you think we have identified the important issues; and if not please suggest your own

Please identify your **three** most important things about the natural environment:

Select up to 3 options.

- ☐ recreation
- ☐ health and well being
- ☐ biodiversity/wildlife
- ☐ access route
- ☐ dog walking
- ☐ out with family and friends
- ☐ organised events
- ☐ spiritual
- ☐ climate change
- ☐ water and rivers
- ☐ agriculture
- ☐ other

If you selected 'other' please tell us what is important to you:

How often do you visit or interact with the natural environment?

- ☐ daily
- ☐ weekly
- ☐ monthly
- ☐ few times a year
- ☐ once a year
- ☐ never

We have identified a lot of different aspects of green infrastructure. Using your local knowledge and experiences do you think that we have included all of the important features?

- ☐ yes
- ☐ no

If 'no' what have we missed and where is it located?

Do you agree with the opportunities presented in the maps in [appendix 4](#)?

Select the most applicable option in each row.

	Yes	No	Don't know
Woodland	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Grassland	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Access	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Flood	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

If you selected 'no' for any of the opportunities, please tell us why?

Do you support the overall aims, vision and objectives of the NSC GI strategy?

The 8 objectives are:

- Improved and better-connected ecological networks
- Greater resilience to climate change
- Sustainable water management
- Health and wellbeing for all
- Create and maintain sustainable places
- Create and maintain valued healthy landscape
- Support sustainable and local food production

- Build a resilient economy

☐ yes

☐ no

If you selected 'no' what do you think they should be?

NSC are committed to working with a variety of partners, developers and private landowners to identify and deliver projects to improve GI.

Do you have the means to work with private landowners to protect and enhance GI on private land?

☐ yes

☐ no

If 'yes' please let us know how you can do this:

Do you have any further comments on the Draft Green Infrastructure strategy and its supporting appendices?
