NHS Digital   Dashboards   **Coronavirus (COVID-19) Vaccine Studies Volunteers Dashboard, UK**

Coronavirus vaccine studies volunteers dashboard

This dashboard shows the number of people signed up for the coronavirus (COVID-19) vaccine studies volunteer service across the United Kingdom. The data is shown by region and local authority area.

Dashboard notice

Dear dashboard user,

Please note, that this dashboard does not contain the recent Clinical Commissioning Group (CCG) or Local Authority (LA) boundary changes as of April 2021. Therefore, CCG and LA boundaries in place prior to these changes are still being shown.

This will be updated in due course and we apologise for any inconvenience caused.

Further information about the April 2021 CCG change is available at Change summary - 2021 CCG mergers - NHS Digital

Beta version

This is a public beta version of this dashboard. It may change without notice.

What this data shows

Vaccines are the most effective way to prevent infectious diseases. They're designed so they do not give people the infection they're protecting against.

Research into vaccines is the only way to find out which vaccines will work. Researchers need people to take part in their studies so they can find out which possible new vaccine works best. NHS Digital have been working with National Institute for Health Research (NIHR) to provide a coronavirus vaccine studies volunteer sign up service which will provide a pool of volunteers across the United Kingdom. In England, the research partner of the NHS is the NIHR. The NIHR has worked with equivalent NHS research partners in Northern Ireland, Scotland and Wales on the coronavirus vaccine studies volunteer sign up service covers all these countries.

The data shown on the dashboard is the number of volunteers in the UK, by local authority and NHS geography. This can be broken down by age, gender, and ethnicity.

Caveats

The count of volunteers is the number of people signed up for the coronavirus vaccine studies volunteer service across the United Kingdom where they have given permission to be contacted for a vaccine study and have completed the verification process.

All geographies have been derived from the volunteer's postcode.

English regions have been derived from the Local Authority. For other UK nations these are shown as the individual countries.

Data where the Local Authority, NHS geography or region could not be derived is not shown in the map or table, but is included in the total UK counts. Data where the age and/or gender and/or ethnicity is unknown is also not shown in the map or table, but is included in the UK total. When filters are applied, the charts, table and map will update automatically. This includes percentages and colour gradients.

The map will only display data by Local Authority. The table can be viewed by Local Authority or NHS geography by using the filter, Geography Type. NHS geographies include Clinical Commissioning Groups (CCGs) for England and the equivalents for Wales and Northern Ireland. For Scotland, it includes Scottish Health Boards. To show the lower geography breakdowns in the table, please select the region of interest from the Table Region(s) filter.

In order to protect confidentiality, no visual is displayed for sub-national breakdowns where a value is between 1 and 7 from the data presented. All other sub-national level data has been

rounded to the nearest 5. When calculating percentages at a sub-national breakdown, a percentage or rate is calculated using the rounded numerator and denominator where the rounded numerator and denominator are greater than 5. Percentages will only be displayed where the rounded denominator is greater than or equal to 400. Therefore regional and local authority counts will not sum to the UK figure.

Dashboard data set and metadata

ARTICLE

Download the dashboard data

If you have not been able to load the dashboard you can download the data as a .csv file.

This section contains descriptions of the column headers found in the .csv file. Definitions for columns in each table are given below;

Column	Age group
Description	Current age based on the date of birth the volunteer entered when completing the volunteering process
Values	All 18-39 40-59 60-79 80+

Column	Gender
Description	Gender registered at birth, based on the details the volunteer entered when completing the volunteering process
Values	All Male Female

Column	Ethnicity

Description	Ethnicity, based on the details the volunteer entered when completing the volunteering process
Values	All Another ethnic group Asian or Asian British Black, African, Black British or Caribbean Mixed or multiple ethnic groups Not known Prefer not to say White

Column	Geography Type
Description	Geography type of the organisation code and name
Values	Local Authority NHS/Health Region

Column	Org code
Description	Organisation code for the geography type, based on the post code details the volunteer entered when completing the volunteering process
Values	All Local Authority code or NHS/Health geography code (derived from volunteer's postcode)

Column	Org name
Description	Organisation name for the geography type, based on the post code details the volunteer entered when completing the volunteering process
Values	All Local Authority name or NHS/Health geography name (derived from volunteer's postcode)

Column	Region code
Description	Region code based on the post code details the volunteer entered when completing the volunteering process
Values	All English Government Office Region (derived from Local Authority) S92000003 W92000004 N92000002

Column	Region name
Description	Region name based on the post code details the volunteer entered when completing the volunteering process
Values	All English Government Office Region (derived from Local Authority) Scotland Wales Northern Ireland

Column	Extract date
Description	Date the data was extracted to the dashboard
Values	

Column	Count of volunteers
Description	Count of volunteers who have given permission to be contacted about a vaccine study and completed the email verification process
Values
