About

UK100 is a network of local leaders who have pledged to lead a rapid transition to Net Zero with Clean Air in their communities ahead of the government's legal target.

UK100's primary purpose is to support a local-led rapid transition to Net Zero and Clean Air. We do this through collaboration. To accelerate action, we believe in bringing together the most influential leaders across the country to learn together and agree on priorities for legislative and regulatory change while empowering them to engage with national decision-makers. We provide our network with the knowledge, tools and connections to make this happen.

Want to become a member? [Read the pledge](#) then get in touch at membership@uk100.org.
