Reported Vaccine Injuries Continue to Climb, Pfizer Seeks Full Approval for COVID Vaccine

VAERS data released today showed 157,277 reports of adverse events following COVID vaccines, including 3,837 deaths and 16,014 serious injuries between Dec. 14, 2020 and April 30, 2021.

The number of reports of injuries and deaths following COVID vaccines continues to rise, according to data released today by the Centers for Disease Control and Prevention (CDC). The data comes directly from reports submitted to the [Vaccine Adverse Event Reporting System \(VAERS\)](#).

[VAERS](#) is the primary government-funded system for reporting adverse vaccine reactions in the U.S. Reports submitted to VAERS require further investigation before a causal relationship can be

From the 4/30/2021 release of VAERS data:

Found 157,277 cases where Vaccine is COVID19

Table

↓	↑ ↓	↑ ↓
Event Outcome	Count	Percent
Death	3,837	2.44%
Permanent Disability	2,277	1.45%
Office Visit	26,045	16.56%
Emergency Room	34	0.02%
Emergency Doctor/Room	21,589	13.73%
Hospitalized	10,684	6.79%
Hospitalized, Prolonged	31	0.02%
Recovered	58,915	37.46%
Birth Defect	103	0.07%
Life Threatening	3,282	2.09%
Not Serious	61,640	39.19%
TOTAL	† 188,437	† 119.81%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 157277 (the number of cases found), and the Total Percentage is greater than 100.

In the U.S., [240.2 million](#) COVID vaccine doses had been administered as of April 30. This [includes](#) 105 million doses of [Moderna's](#) vaccine, 127 million doses of [Pfizer](#) and 8 million doses of the [Johnson & Johnson \(J&J\) COVID vaccine](#).

Of the 3,837 deaths reported as of April 30, 24% occurred within 48 hours of vaccination, 16% occurred within 24 hours and [39% occurred](#) in people who became ill [within 48 hours](#) of being vaccinated.

This week's VAERS data show:

- 21% of deaths were related to cardiac disorders.
- 54% of those who died were male, 44% were female and the remaining death reports did not include gender of the deceased.
- The [average age](#) of death was 75.1 and the [youngest deaths](#) reported include two 15-year-olds (VAERS I.D. [1187918](#) and [1242573](#)) and a 16-year-old (VAERS I.D. [1225942](#)). There were other reported deaths in children under 16 that could not be confirmed or contained obvious errors.
- As of April 30, [805 pregnant women](#) reported adverse events related to COVID vaccines, including 235 reports of [miscarriage or premature birth](#).
- Of the [1,597 cases of Bell's Palsy reported](#), 51% were reported after [Pfizer-BioNTech](#) vaccinations, 40% following vaccination with the Moderna vaccine and 131 cases, or 10%, of Bell's Palsy cases were reported in conjunction with J&J.
- There were [162 reports of Guillain-Barré Syndrome](#) with 41% of cases attributed to Pfizer, 45% to Moderna and 19% to J&J.

- There were [44,348 reports of anaphylaxis](#) with 38% of cases attributed to [Pfizer's vaccine](#), 47% to [Moderna](#) and 14% to [J&J](#).

FDA set to authorize Pfizer vaccine for young teens

On May 4, The Defender [reported](#) the U.S. Food and Drug Administration (FDA) is preparing to authorize use of the Pfizer-BioNTech COVID vaccine in adolescents 12 to 15 years old by early next week.

The company [said](#) it also plans to ask the FDA to expand [Emergency Use Authorization](#) for its vaccine for children ages 2 to 11 in September.

According to [CDC data](#), the death rate among adolescents ages 0 to 17 who get [COVID](#) and are subsequently hospitalized is 0.7%, with many experiencing either mild or [no symptoms](#) at all. The COVID death rate in all [adolescent age categories](#) is less than 0.1%, leading [some experts](#) to question whether vaccines should be targeted to an age group that so far appears to be mostly spared from severe COVID.

As [CNN reported](#) Friday, Pfizer filed for full FDA approval for its COVID vaccine for people ages 16 and up. The FDA requires vaccine manufacturers submit data on manufacturing processes, facilities and additional information that demonstrates the vaccine can be produced reliably and consistently.

Once all the required information is submitted, a goal date will be set for a decision by the FDA. Pfizer requested [priority review](#), which asks the FDA to take action within six months, compared to 10 months designated under standard review.

Third U.S. male diagnosed with vaccine-induced blood clots, woman dies from brain hemorrhage after J&J vaccine

On May 6, [The Defender reported](#) doctors at University of Utah Health treated the third male to develop vaccine-induced thrombotic thrombocytopenia in the U.S.

The man, under age 50, received J&J's vaccine in early April. Ten days later he experienced pain in his toes, which then progressed to his thighs. He later began experiencing chest pain. A CT scan [revealed](#) a [bilateral pulmonary embolism](#). Physicians discovered low platelets and blood clots in his legs and lungs, leading them to [suspect VITT](#) was the cause.

On May 4, [The Defender reported](#) a 35-year-old Michigan woman died from complications 11 days after receiving J&J's vaccine. The woman's family said her headache started on April 16 — eight days after being vaccinated. She died three days later. Her death certificate notes a natural death, specifically from an [acute subarachnoid hemorrhage](#), or bleeding between the brain and tissue around the brain.

The attending physician filed a report to VAERS. In an email to the family, the [CDC confirmed](#) her death had been reported to VAERS, but said the system is not designed to determine whether a reported adverse event was caused by the vaccine.

[Children's Health Defense](#) queried the VAERS data for adverse events associated with the formation of clotting disorders and other related conditions and found [2,808 reports](#) for all three vaccines from Dec. 14, 2020, through April 30.

Of the 2,808 cases reported, there were [1043 reports](#) attributed to Pfizer, [893 reports](#) to Moderna and [860 reports](#) to J&J — 847 cases more than U.S. health officials acknowledged during the April 23

meeting where it was [recommended](#) the pause be lifted on J&J's vaccine.

Denmark ditches J&J vaccine

On May 3, [The Defender reported](#) Denmark became the first country to exclude J&J's COVID vaccine from its vaccination program over a [potential link](#) to blood clotting disorders.

The Danish Health Authority said in a statement it had concluded "the benefits of using the COVID-19 vaccine from J&J do not outweigh the risk of causing the possible adverse effect in those who receive the vaccine."

"Taking the present situation in Denmark into account, what we are currently losing in our effort to prevent severe illness from COVID-19 cannot outweigh the risk of causing possible side effects in the form of severe blood clots in those we vaccinate," the health authority said.

Denmark stopped using AstraZeneca's vaccine last month after European regulators [found a possible link](#) between the vaccine and "very rare" blood clots.

CDC ignores The Defender, no response after two months

According to the [CDC website](#), "the CDC follows up on any report of death to request additional information and learn more about what occurred and to determine whether the death was a result of the vaccine or unrelated."

[The Defender](#) reached out to the CDC on March 8 with a written list of questions about reported deaths and injuries related to COVID vaccines, the status of ongoing investigations reported in the media, if autopsies are being done, the standard for determining whether an injury is causally connected to a vaccine, and education initiatives to encourage and facilitate proper and accurate reporting.

We have made numerous attempts to contact the CDC via phone and email. As of May 7, 60 days after our initial inquiry, we still have yet to receive answers to our questions.

[Children's Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

I get pissed off every day at the level of evil & global corruption that is behind this world depopulation event. The number dead as of May 4th is now 4,178 & many of us know this represents a small fraction of the number of deaths.

Why is this happening? Because psychopathic globalists want even more power & money. The global vaccine market in 2020 reached 59 billion after decades of growth. How about the
